BGSEALER

PRODUCT GUIDELINE

LIMESTONE & SANDSTONE SEALER

Available in
10 LITRE
20 LITRE

BG Limestone and Sandstone Sealer is specially designed to protect and enhance porous stones in vertical and horizontal positions with their unique penetrating hydrophobic resin system.

This technology supports the breathability of the stone as well as protecting it from efflorescent and biocide growth on top of the surface. We recommend 2-3 layers depending on porosity of the applied surface. This Sealer is fast recoatable <60 minutes depending on temperature and humidity.

Full cure 7 days.

Areas of use: Natural Limestone, Sandstone

For full technical and product application information please view our products information on the homepage.

PRODUCT ADVANTAGES:

- ✓ Extremely water repellent
- ✓ Protects and enhances stone surfaces
- ✓ Allows natural stone surfaces to breathe
- ✓ Improves life of surfaces
- ✓ Resists mould growth & fungicides growth
- ✓ Suitable for interior and exterior use
- ✓ Spreading rate approximately 2-3m² per litre

DIAMOND HARD WATER BASED CONCRETE SEALER

Diamond Hard Water Based Concrete Sealer is a single component, water based non yellowing transparent liquid sealer. It's fine particle distribution Emulsion Technology provides a durable protective clear coating for exterior and interior surfaces. It is the perfect choice for any professional tradespersons & DIY projects at home.

The normal recommendation for the product would be to apply 2 coats. For porous surfaces a 3rd coat might be required.

Can be used on the following areas:

Concrete surfaces, bricks, pavers, exposed aggregate.

Full Cure 7 days

For full technical and product application information please view our product information on the homepage.

PRODUCT ADVANTAGES:

- ✓ Ready to use & easy to apply.
- ✓ Eco-friendly, non-toxic and UV stable
- ✓ Single component water based system
- ✓ Low Sheen finish
- ✓ A natural-look product with exceptional water repellence and surface-binding properties
- ✓ Suitable for concrete surfaces. Ideal for driveways and footpaths
- ✓ Spreading rate approximately 4 - 7m²/litre
- ✓ Improves the structural properties of surfaces
- ✓ Improves impact and abrasion

TRAVERTINE SEAL & ENHANCE

Available in
1 LITRE

Travertine Seal & Enhance is a premium Travertine Sealer which has modified and improved Perfluorinated Chain sealing technology. This can be applied to internal and external hard stones such as Travertine, Bluestone, Granite, Marble and more.

Platinum Seal & Enhance provides excellent water and oil repellence for a fully treated surface. The strong stain resistance has been tested successfully against olive oil, coffee, tomato sauce and mustard. A fully treated surface enhances the natural look of the stone for many years to come.

Suitable areas: Dense stone floor & wall tile, stone and concrete bench tops, kitchen and living rooms, family patios and entertainment areas.

For full technical and product application information please view our product information on the homepage.

PRODUCT ADVANTAGES:

- ✓ Water based
- ✓ Suitable for interior & exterior surfaces
- ✓ Maintains clear natural stone appeal
- ✓ UV Resistant
- ✓ Allows natural stone to breathe
- ✓ Protects without affecting slip resistance
- ✓ Excellent water and oil repellence
- ✓ Good abrasion resistance
- ✓ Improves life expectancy of surfaces
- ✓ Easy to clean surfaces
- ✓ Horizontal and vertical application
- ✓ Sheen: Low Sheen
